

Before

After

Many thanks to those that have volunteered to help reclaim Springs Park from the highly invasive Autumn Olive species. We began pulling these plants out by the roots, (over 200 trees so far), via winch and 4 wheel drive truck. While our goal is eradication, the nature of this species is very resilient, and therefore we will at the least control the spread and reclaim paths and vistas. Volunteers have helped us load the trucks, fill in the holes left by the roots being pulled, and eating fruit on the trees (each olive fruit eaten is one less seed that can no longer sprout!). Our efforts will continue over this winter into spring, so if you have the time or additional equipment that you would be willing to lend, please contact our office @ 324-7420 to get the dates and times we will be working on site. Thanks in advance for helping to manage your park.
